

Organiser pocket visimap DIN A4

From the advertising measures to the delivery of the vehicle, the EICHNER appointment control system makes it possible to monitor all important processes systematically. Appointment strips and coloured tabs on the head rail of each multi-functional suspension pocket signal what is to happen when, inscription labels mark the process. The appointment strips are doubly useful, as they are printed on both sides with different scales. Inscription labels and appointment strips are easy to exchange. Depending on the content and tasks, the various processes and planned appointments are depicted clearly on the appointment strips with coloured signal tabs. Your original documentation, such as offers, promotional letters, purchasing contracts, invoices, orders or calculations etc are carefully and tidily accommodated and stored together in one place.
