

Key Drop & Pick-up Vending

With this electronic key vending system and drop box you can handover the car keys without contact - 24/7! Regardless of opening hours!

Keys are secured in 6 separate compartments. The system is also suitable for large or bulky keys. Each key has its own access code.

A master password is used to program all compartments and the system settings. Also all codes are protected in the event of a power failure. Codes can be emailed or delivered via telephone to customers for pick-up after hours.

Features of the Key Drop & Pick-up Vending System:

The front display makes the handling easier and can also be programmed for access with 2 time frame windows (such as morning and night). The creation of locking protocols increases traceability and provides security.

This vending and drop box system is especially important for car dealerships or automotive workshops. The lower envelope form holder has space for up to 20 envelopes. We recommend mounting where it is safe from rain.

- Keys are secured in 6 separate compartments
- also suitable for large or bulky keys
- master password is used to program all compartments
- all codes are protected in the event of a power failure
- can also be programmed for access with 2 time frame windows
- creation of locking protocols
- size: 850 x 400 x 180 mm
- weight: 31 kg
- PU: 1 pcs
- MOQ: 1 pcs
