

Rubberised power magnet with hook

The rubber-coated magnetic hook with a load capacity of up to 21 kilos is your ideal helper for the workshop and materials storage!

Thanks to the impressive load capacity of the neodymium magnet and the protective rubber coating, this magnetic hook offers numerous advantages. It can be used flexibly on almost all metal surfaces - without the need for gluing, drilling or screwing.

Whether for attaching tools and equipment, organising cables and hoses or storing safety goggles, gloves and other important utensils - this magnetic hook is extremely versatile. Hang heavy equipment such as drills and sanders securely, or use it to organise extension cables and chains. The rubber coating protects sensitive surfaces from scratches, so you can use the hook on painted or polished surfaces without hesitation.

The magnetic hook also provides valuable services in material storage: Attach signage, notes or stock lists to metal shelves or use it to neatly store small containers and bags. When the magnetic hook is no longer needed, it can simply be removed by tilting it sideways - quickly, cleanly and easily.

- Size: 43 x 6 mm
- rubber-coated
- 100N
- PU: 1 pack of 5 pcs
- MOQ: 1 pack of 5 pcs
